

## Creating engaging courses and learning paths

Create and deliver innovative learning programmes which can include various format of content, activities and resources.

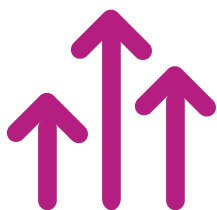

### Combine various formats of content and learning activities

Built on Moodle, the Learning Management System the most used by universities worldwide, Agora provides a powerful hosting solution for almost any type of learning resource: elearning modules produced or provided by third parties, videos, podcasts, documents, web-resources and more. Agora includes powerful solutions to assemble and structure programmes using existing or new resources, as well as activities such as discussion forums, assignments, wikis or quizzes.

### Leverage social learning dynamics

Agora allows you to easily include and manage various types of activities which increase the level of interaction with and between learners. These include for example discussion forums, wikis or chats.

### Articulate learning opportunities into learning paths

A *Learning Path* is a set of courses, resources and/or events, which can be packaged and structured with great flexibility. A *Learning Path* is an effective way to guide learners interested in acquiring a certain set of skills or knowledge.

### Assess learners' progress efficiently

Complement your courses and programmes with assessment activities. If you do not have resources to provide individualized tutors feedback on assignments, consider the use of quizzes or peer-reviewed assignments.

### Control the delivery of your initiatives

Agora provides you with all the tools needed to deliver your courses or learning paths effectively; with solutions for registrations management, monitoring, communication, certificates generation or advanced evaluation.
