

Supporting managers in developing their team's performance

Agora provides tools to plan and monitor team members learning activities. 

Identify learning opportunities linked to specific competencies

Agora supports a competency based approach to learning. Whether trying to address performance issues or looking at the development individuals' potential, as a manager you can easily identify development opportunities linked to competencies.

Create effective learning plans

Whether you are looking at developing competencies, achieving defined goals or completing specific courses, Agora's *Learning Plans* templates help effectively plan appropriate learning initiatives. Target dates and priority levels can be determined, to make monitoring more effective.

Approve requests and manage workflows online

You can rapidly and securely manage endorsement requests, validate learning plans from wherever you are as long as you have an internet connection.

Monitor your team's learning and development

My Team allows you to access learning plans, user profiles, and course progress records of team members. You can monitor progress and keep informed of learning initiatives in your team. These tools are available from any web-enabled computer, laptop, tablet or smartphone.
